LOCKWALL LADDER REPLACEMENT

LONDON LOCKS AND DAM

KANAWHA RIVER, MILE 82.8

Notice is given that on or about 23 January 2017, Amherst Madison will begin replacing the lower lockwall ladders on the river wall at London Locks and Dam, Kanawha River, mile 82.8.

The contractor's floating plant will consist of the M/V TOM COOK, one barge mounted crane, and one material barge. The M/V TOM COOK will be monitoring marine channels 13 and 16. This work will be performed from 6:00 a.m. to 4:00 p.m., Monday through Thursday, with an anticipated completion date of 17 February 2017.

During working hours, the land chamber will be available to mariners. During non-working hours, the contractor's floating plant will be moved and the river chamber will be available unless circumstances dictate otherwise. In that event, the land chamber will be available. Locking through the river chamber will require four deckhands as the vertical lockwall ladders will not be in service.

Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after locking arrangements have been made with the project.
