For Immediate Release

Corps names new chief for geotechnical engineering branch

HUNTINGTON, WV... Steven Brewster has been named the new chief of the geotechnical engineering branch for the Huntington District, U.S. Army Corps of Engineers (USACE).

As chief of the geotechnical engineering branch, Brewster manages aspects of engineering geology and dam safety programs associated with flood damage reduction dams, floodwalls and levees, as well as navigation projects within Huntington District.

A native of Pineville, W.Va., Brewster received a Bachelor of Science degree from Marshall University and is a Registered Professional Geologist. He has been with the Corps 22 years. Brewster is also a recent graduate of the Corps Leadership Continuing Education Program, which is administered by Marshall University.

For more information, please contact the Huntington District Public Affairs office at (304) 399-5353.
