OVERHEAD CABLE INSTALLATION

KANAWHA RIVER, MILE 68.3

Notice is given that on or about 21 August 2007; Appalachian Power Company will be re-installing a communications cable across the Kanawha River, mile 68.3.

The contractors' floating plant will consist of a work boat used to pull the cable across the channel, with tensioning equipment located on the bank. The work boat will be monitoring marine channels 13 and 16. The hours for this work will be 10:00 am to 2:00 pm and it is expected to be completed on or about 21 August 2007. Should inclement weather prevent operations on 21 August 2007, the work will be completed on or about 22 August 2007.

During non-working hours, the contractors' floating plant will be moored at the work site on the left descending bank and lighted according to regulations.

Since this work extends across the navigation channel, mariners must contact the work boat to make passing arrangements. Once these arrangements are made, vessels should pass at the slowest safe speed to minimize wake.

A handwritten signature in black ink that reads "Arlie D. Bishop".

ARLIE D. BISHOP
Chief, Technical Support Branch
