

**U.S. ARMY CORPS OF ENGINEERS
REGULATORY PROGRAM
APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM)
NAVIGABLE WATERS PROTECTION RULE**

I. ADMINISTRATIVE INFORMATION

Completion Date of Approved Jurisdictional Determination (AJD): 7/15/2020

ORM Number: LRH-2020-462-SCR

Associated JDs: No

Review Area Location¹: State/Territory: Ohio City: Truro Township County/Parish/Borough: Franklin

Center Coordinates of Review Area: Latitude 39.97132 Longitude -82.78644

II. FINDINGS

A. Summary: Check all that apply. At least one box from the following list MUST be selected. Complete the corresponding sections/tables and summarize data sources.

- The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: N/A or describe rationale.
- There are “navigable waters of the United States” within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- There are “waters of the United States” within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

B. Rivers and Harbors Act of 1899 Section 10 (§ 10)²

§ 10 Name	§ 10 Size		§ 10 Criteria	Rationale for § 10 Determination
N/A.	N/A.	N/A	N/A.	N/A.

C. Clean Water Act Section 404

Territorial Seas and Traditional Navigable Waters ((a)(1) waters): ³				
(a)(1) Name	(a)(1) Size		(a)(1) Criteria	Rationale for (a)(1) Determination
N/A.	N/A.	N/A.	N/A.	N/A.

Tributaries ((a)(2) waters):				
(a)(2) Name	(a)(2) Size		(a)(2) Criteria	Rationale for (a)(2) Determination
Stream 1	2,429	linear feet	(a)(2) Perennial tributary contributes surface water flow directly or indirectly to an (a)(1) water in a typical year.	Stream 1 is a perennial tributary to Blacklick Creek, an (a)(2) water an indirect tributary to the Scioto River, an (a)(1) TNW, in a typical year (reference Section III B of this AJD form) at a location outside the area of interest (AOI), (reference Section III B of this AJD form).
Stream 2	991	linear feet	(a)(2) Perennial tributary contributes	Stream 2 is a perennial tributary to Blacklick Creek, an (a)(2) water an indirect tributary to the Scioto River, an (a)(1) TNW, in a typical year (reference

¹ Map(s)/figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

REGULATORY PROGRAM
APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM)
NAVIGABLE WATERS PROTECTION RULE**

Tributaries ((a)(2) waters):			
(a)(2) Name	(a)(2) Size	(a)(2) Criteria	Rationale for (a)(2) Determination
		surface water flow directly or indirectly to an (a)(1) water in a typical year.	Section III B of this AJD form) at a location outside the area of interest (AOI), (reference Section III B of this AJD form)..

Lakes and ponds, and impoundments of jurisdictional waters ((a)(3) waters):			
(a)(3) Name	(a)(3) Size	(a)(3) Criteria	Rationale for (a)(3) Determination
N/A.	N/A	N/A.	N/A

Adjacent wetlands ((a)(4) waters):			
(a)(4) Name	(a)(4) Size	(a)(4) Criteria	Rationale for (a)(4) Determination
Wetland A	0.05 acre(s)	(a)(4) Wetland abuts an (a)(1)-(a)(3) water.	Wetland A is an (a)(4) water that directly abuts Stream 1, an perennial (a)(2) water in a typical year.
Wetland B	0.02 acre(s)	(a)(4) Wetland abuts an (a)(1)-(a)(3) water.	Wetland B is an (a)(4) water that directly abuts Stream 1, an perennial (a)(2) water in a typical year.
Wetland E	0.22 acre(s)	(a)(4) Wetland abuts an (a)(1)-(a)(3) water.	Wetland E is an (a)(4) water that directly abuts Stream 1, an perennial (a)(2) water in a typical year.

D. Excluded Waters or Features

Excluded waters ((b)(1) – (b)(12)): ⁴			
Exclusion Name	Exclusion Size	Exclusion ⁵	Rationale for Exclusion Determination
Wetland C	0.04 acre(s)	(b)(1) Non-adjacent wetland.	Wetland C does not meet the definition of an adjacent wetland (33 CFR 328.3(c)(1)(i)-(iv)), is not considered a water of the United States per 33 CFR 328.3(b)(1), and is not subject to regulation under Section 404. Reference Section III B of this AJD form for typical year assessments.
Wetland D	0.01 acre(s)	(b)(1) Non-adjacent wetland.	Wetland D does not meet the definition of an adjacent wetland (33 CFR 328.3(c)(1)(i)-(iv)), is not considered a water of the United States per 33 CFR 328.3(b)(1), and is not subject to regulation under Section 404. Reference Section III B of this AJD form for typical year assessments.
Swale 1	2,300 linear feet	(b)(3) Ephemeral feature, including an ephemeral	Swale 1 does not contribute flow to an (a)(1) water in a typical year, is an artificial (manmade)

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

III. SUPPORTING INFORMATION

A. Select/enter all resources that were used to aid in this determination and attach data/maps to this document and/or references/citations in the administrative record, as appropriate.

Information submitted by, or on behalf of, the applicant/consultant: [Investigation of Waters of the United States Spring Hill Property, Truro Township, Franklin County, Ohio, dated July 10, 2020.](#)

This information **Select.** sufficient for purposes of this AJD.

Rationale: [N/A](#)

- Data sheets prepared by the Corps: [Title\(s\) and/or date\(s\).](#)
- Photographs: [Aerial and Other: Within referenced JD report.](#)
- Corps site visit(s) conducted on: [Date\(s\).](#)
- Previous Jurisdictional Determinations (AJDs or PJDs): [N/A](#)
- Antecedent Precipitation Tool: [provide detailed discussion in Section III.B.](#)
- USDA NRCS Soil Survey: [Franklin County, Ohio](#)
- USFWS NWI maps: [Title\(s\) and/or date\(s\).](#)
- USGS topographic maps: [1:24K Reynoldsburg, OH Quad.](#)

Other data sources used to aid in this determination:

Data Source (select)	Name and/or date and other relevant information
USGS Sources	N/A.
USDA Sources	N/A.
NOAA Sources	N/A.
USACE Sources	N/A.
State/Local/Tribal Sources	N/A.
Other Sources	USACE Wetland Data Forms and ORAM Forms within referenced report.

B. Typical year assessment(s): [A typical year occurs over a rolling thirty year period and includes the analysis of precipitation and other climatic variables to establish a normal period range \(seasonally or annually\) for a specific geographic region where the aquatic resource occurs. One point-in-time data source, 17 June 2020 \(Wet Season\), with a corresponding APT report, were included in the evaluation for the excluded features onsite. The antecedent precipitation tool was utilized to determine typical year for point-in-time data sources. Wetland adjacency was assessed on 17 June 2020. Based on the antecedent precipitation tool, 17 June 2020 is included during the WebWIMP wet season and has a Palmer Drought Severity Index of 2.32 moderate wetness. The 30-day rolling total for precipitation was higher than the 30-year normal range. Therefore, site conditions are higher than the typical year conditions. Even at a higher than normal range the wetlands still had no adjacency and did not abut the \(a\)\(2\) streams located onsite.](#)

C. Additional comments to support AJD: [The property is located outside of the FEMA 100 year floodplain.](#)
