

**U.S. ARMY CORPS OF ENGINEERS
REGULATORY PROGRAM
APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM)
NAVIGABLE WATERS PROTECTION RULE**

I. ADMINISTRATIVE INFORMATION

Completion Date of Approved Jurisdictional Determination (AJD): 6/29/2021
 ORM Number: LRH-2021-357-SCR- UT to Buck Run
 Associated JDs: N/A
 Review Area Location¹: State/Territory: Ohio City: Marysville County/Parish/Borough: Union
 Center Coordinates of Review Area: Latitude 40.198502 Longitude -83.390217

II. FINDINGS

A. Summary: Check all that apply. At least one box from the following list MUST be selected. Complete the corresponding sections/tables and summarize data sources.

- The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: N/A or describe rationale.
- There are “navigable waters of the United States” within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- There are “waters of the United States” within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

B. Rivers and Harbors Act of 1899 Section 10 (§ 10)²

§ 10 Name	§ 10 Size	§ 10 Criteria	Rationale for § 10 Determination
N/A.	N/A.	N/A.	N/A.

C. Clean Water Act Section 404

Territorial Seas and Traditional Navigable Waters ((a)(1) waters): ³			
(a)(1) Name	(a)(1) Size	(a)(1) Criteria	Rationale for (a)(1) Determination
N/A.	N/A.	N/A.	N/A.

Tributaries ((a)(2) waters):			
(a)(2) Name	(a)(2) Size	(a)(2) Criteria	Rationale for (a)(2) Determination
Stream 2	67	linear feet	(a)(2) Intermittent tributary contributes surface water flow directly or indirectly to an (a)(1) water in a typical year.
			Stream 2 is an intermittent, indirect tributary to the Scioto River, an (a)(1) water, at a location outside of the review area. Stream 2 contributes intermittent surface water flow indirectly to the Scioto River, an (a)(1) water, in a typical year (reference Section III B below).

¹ Map(s)/figure(s) are attached to the AJD provided to the requestor.
² If the navigable water is not subject to the ebb and flow of the tide or included on the District’s list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.
³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

Lakes and ponds, and impoundments of jurisdictional waters ((a)(3) waters):				
(a)(3) Name	(a)(3) Size		(a)(3) Criteria	Rationale for (a)(3) Determination
Pond 1	4.34	acre(s)	(a)(3) Lake/pond or impoundment of a jurisdictional water contributes surface water flow directly or indirectly to an (a)(1) water in a typical year.	Pond 1 contributes surface water flow directly or indirectly to an (a)(1) water, the Scioto River, at a location outside of the review area.

Adjacent wetlands ((a)(4) waters):				
(a)(4) Name	(a)(4) Size		(a)(4) Criteria	Rationale for (a)(4) Determination
N/A	N/A	N/A.	N/A.	N/A

D. Excluded Waters or Features

Excluded waters ((b)(1) – (b)(12)): ⁴				
Exclusion Name	Exclusion Size		Exclusion ⁵	Rationale for Exclusion Determination
Wetland 1	0.12	acre(s)	(b)(1) Non-adjacent wetland.	Wetland 1 does not abut an (a)(1), (a)(2), or (a)(3) water, is not inundated by flooding from an (a)(1), (a)(2), or (a)(3) water in a typical year, and is not physically separated from an (a)(1), (a)(2), or (a)(3) water by a natural or artificial barrier.
Wetland 2	0.03	acre(s)	(b)(1) Non-adjacent wetland.	Wetland 2 does not abut an (a)(1), (a)(2), or (a)(3) water, is not inundated by flooding from an (a)(1), (a)(2), or (a)(3) water in a typical year, and is not physically separated from an (a)(1), (a)(2), or (a)(3) water by a natural or artificial barrier.
Wetland 3	0.4	Acre(s)	(b)(1) Non-adjacent wetland.	Wetland 3 does not abut an (a)(1), (a)(2), or (a)(3) water, is not inundated by flooding from an (a)(1), (a)(2), or (a)(3) water in a typical year, and is not physically separated from an (a)(1), (a)(2), or (a)(3) water by a natural or artificial barrier.
Stream 1	139	linear feet	(b)(3) Ephemeral feature, including an ephemeral stream, swale, gully, rill, or pool.	Stream 1 is an ephemeral stream and meets the definition of “ephemeral” in paragraph (c)(3). Reference Section III D for typical year assessments.
Stream 3	334	linear feet	(b)(3) Ephemeral feature, including	Stream 3 is an ephemeral stream and meets the definition of “ephemeral” in paragraph (c)(3).

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

Excluded waters ((b)(1) – (b)(12)): ⁴			
Exclusion Name	Exclusion Size	Exclusion ⁵	Rationale for Exclusion Determination
		an ephemeral stream, swale, gully, rill, or pool.	Reference Section III D for typical year assessments.

III. SUPPORTING INFORMATION

A. Select/enter all resources that were used to aid in this determination and attach data/maps to this document and/or references/citations in the administrative record, as appropriate.

- Information submitted by, or on behalf of, the applicant/consultant: [The applicant, submitted the Jurisdictional Waters Delineation Report \(report\), dated April 22, 2021](#)
This information is sufficient for purposes of this AJD.
Rationale: [The information provided by or on behalf of the applicant accurately reflects the District's conclusions on the AJD.](#)
- Data sheets prepared by the Corps: [Title\(s\) and/or date\(s\).](#)
- Photographs: [Aerial and Other: In the report referenced above.](#)
- Corps site visit(s) conducted on: [Date\(s\).](#)
- Previous Jurisdictional Determinations (AJDs or PJDs): [ORM Number\(s\) and date\(s\).](#)
- Antecedent Precipitation Tool: [provide detailed discussion in Section III.B.](#)
- USDA NRCS Soil Survey: [Appendix 1 in report referenced above.](#)
- USFWS NWI maps: [Appendix 1 in report referenced above.](#)
- USGS topographic maps: [Appendix 1 in report referenced above.](#)

Other data sources used to aid in this determination:

Data Source (select)	Name and/or date and other relevant information
USGS Sources	N/A.
USDA Sources	N/A.
NOAA Sources	N/A.
USACE Sources	N/A.
State/Local/Tribal Sources	N/A.
Other Sources	N/A.

B. Typical year assessment(s): A typical year occurs over a rolling thirty year period and includes the analysis of precipitation and other climatic variables to establish a normal period range (seasonally or annually) for a specific geographic region where the aquatic resource occurs. One point-in-time data sources, one for 23 March 2021, with a corresponding APT report, were included in the evaluation for the streams listed in Section II D. According to the APT report of 23 March 2021, normal conditions were observed during the wet season, a PSDI Value was unavailable, and an ARC score of 12. The antecedent precipitation condition is considered “normal” for that point in time. Based on the pictures submitted with the Report, during normal conditions in the wet season, little to no flow was observed, supporting the fact that the ephemeral streams do not meet the flow requirements of a jurisdictional tributary. It has been determined that the ephemeral streams listed in Section II D, above, exhibit ephemeral flow, and are not waters of the United States per 33 CFR 328.3(b)(3), and are not subject to regulation under Section 404. Stream 2, and Pond 1 contribute intermittent flow downstream indirectly to the Scioto River, an (a)(1) water in a typical year. Therefore, Stream 2 is an (a)(2) water, and Pond 1 is an (a)(3) water.
