

U.S. ARMY CORPS OF ENGINEERS  
REGULATORY PROGRAM  
APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM)  
NAVIGABLE WATERS PROTECTION RULE

**I. ADMINISTRATIVE INFORMATION**

Completion Date of Approved Jurisdictional Determination (AJD): 24-SEP-2020  
ORM Number: LRH-2020-00091  
Associated JDs: N/A or ORM numbers and identifiers (e.g. HQS-2020-00001-MSW-MITSITE)  
Review Area Location<sup>1</sup>:  
State/Territory: OH City: Green Township County/Parish/Borough: Ross County  
Center Coordinates of Review Area: Latitude 39.42211 Longitude -82.966895

**II. FINDINGS**

**A. Summary:** Check all that apply. At least one box from the following list **MUST** be selected. Complete the corresponding sections/tables and summarize data sources.

- The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: N/A or describe rationale.
- There are “navigable waters of the United States” within Rivers and Harbors Act jurisdiction within the review area (complete table in section II.B).
- There are “waters of the United States” within Clean Water Act jurisdiction within the review area (complete appropriate tables in section II.C).
- There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in section II.D).

**B. Rivers and Harbors Act of 1899 Section 10 (§ 10)<sup>2</sup>**

§ 10 Name	§ 10 Size	§ 10 Criteria	Rationale for § 10 Determination
N/A	N/A	N/A	N/A

**C. Clean Water Act Section 404**

Territorial Seas and Traditional Navigable Waters ((a)(1) waters)<sup>3</sup>

(a)(1) Name	(a)(1) Size	(a)(1) Criteria	Rationale for (a)(1) Determination
N/A	N/A	N/A	N/A

Tributaries ((a)(2) waters):

(a)(2) Name	(a)(2) Size	(a)(2) Criteria	Rationale for (a)(2) Determination
Stream A	3396.7 feet	(a)(2) Intermittent tributary contributes surface water flow directly or indirectly to an (a)(1) water in a typical year	Stream A is an intermittent tributary to the Scioto River, an (a)(1) water, at a location outside of the AOI in a typical year (reference Section III B of this AJD form).
Stream I	187.424 feet	(a)(2) Intermittent tributary contributes surface water flow directly or indirectly to an (a)(1) water in a typical year	Stream I is an intermittent tributary to Kinnikinnick Creek, an (a)(2) water, an indirect tributary to the Scioto River, an (a)(1) water, at a location outside of the AOI in a typical year (reference Section III B of this AJD form).
Stream I-1	81.1228 feet	(a)(2) Intermittent tributary contributes surface water flow directly or indirectly to an (a)(1)	Stream I is an intermittent tributary to Kinnikinnick Creek, an (a)(2) water, an indirect tributary to the Scioto River, an (a)(1) water, at a location outside of the AOI

<sup>1</sup> Map(s)/Figure(s) are attached to the AJD provided to the requestor.

<sup>2</sup> If the navigable water is not subject to the ebb and flow of the tide and included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

<sup>3</sup> A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where independent upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD form.

<sup>4</sup> Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps Districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

<sup>5</sup> Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

NAVIGABLE WATERS PROTECTION RULE

		water in a typical year	in a typical year (reference Section III B of this AJD form).
Stream K	658.498 feet	(a)(2) Intermittent tributary contributes surface water flow directly or indirectly to an (a)(1) water in a typical year	Stream K is an intermittent tributary to the Scioto River, an (a)(1) water, at a location outside of the AOI in a typical year (reference Section III B of this AJD form).

Lakes and ponds, and impoundments of jurisdictional waters ((a)(3) waters):

(a)(3) Name	(a)(3) Size	(a)(3) Criteria	Rationale for (a)(3) Determination
N/A	N/A	N/A	N/A

Adjacent wetlands ((a)(4) waters):

(a)(4) Name	(a)(4) Size	(a)(4) Criteria	Rationale for (a)(4) Determination
Wetland 1	12.1337 acres	(a)(4) Wetland abuts an (a)(1)-(a)(3) water	Wetland 1 is an (a)(4) water that directly abuts Stream A, an intermittent (a)(2) water in a typical year.
Wetland 14	0.8644 acres	(a)(4) Wetland abuts an (a)(1)-(a)(3) water	Wetland 14 is an (a)(4) water that directly abuts Stream I, an intermittent (a)(2) water in a typical year.
Wetland 2	32.9207 acres	(a)(4) Wetland abuts an (a)(1)-(a)(3) water	Wetland 2 is an (a)(4) water that directly abuts an offsite perennial stream (a)(2) water in a typical year.
Wetland 26	0.3128 acres	(a)(4) Wetland abuts an (a)(1)-(a)(3) water	Wetland 26 is an (a)(4) water that directly abuts Stream I-1, an intermittent (a)(2) water in a typical year.
Wetland 27	0.0826 acres	(a)(4) Wetland abuts an (a)(1)-(a)(3) water	Wetland 27 is an (a)(4) water that directly abuts an off-site intermittent stream (a)(2) water in a typical year.
Wetland 5	1.5423 acres	(a)(4) Wetland abuts an (a)(1)-(a)(3) water	Wetland 5 is an (a)(4) water that directly abuts Stream I, an intermittent (a)(2) water in a typical year.

**D. Excluded Waters or Features**

Excluded waters ((b)(1) – (b)(12))<sup>4</sup>:

Exclusion Name	Exclusion Size	Exclusion <sup>5</sup>	Rationale for Exclusion Determination
Open Water Pond A	0.3739 acres	(b)(8) Artificial lake/pond constructed or excavated in upland or a non-jurisdictional water, so long as the artificial lake or pond is not an impoundment of a jurisdictional water that meets (c)(6)	Feature does not contribute flow to an (a)(1)-(a)(2) water, it is an artificial (manmade) feature constructed entirely in uplands, and is not an impoundment of a (a)(1)-(a)(2) water.
Stream B	931.789 feet	(b)(3) Ephemeral feature, including an ephemeral stream, swale, gully, rill, or pool	Feature does not contribute flow to an (a)(1)-(a)(2) water, it is an artificial (manmade) feature constructed entirely in uplands, and is not an impoundment of a (a)(1)-(a)(2) water.
Stream B-1	125.358 feet	(b)(3) Ephemeral feature, including an ephemeral stream, swale, gully, rill, or pool	Feature does not contribute flow to an (a)(1)-(a)(2) water, it is an artificial (manmade) feature constructed entirely in uplands, and is not an impoundment of a (a)(1)-(a)(2) water.
Stream C	572.157 feet	(b)(3) Ephemeral feature, including an ephemeral stream, swale, gully, rill, or pool	Feature does not contribute flow to an (a)(1)-(a)(2) water, it is an artificial (manmade) feature constructed entirely in uplands, and is not an impoundment of a (a)(1)-(a)(2) water.
Stream C-1	165.249 feet	(b)(3) Ephemeral feature, including an ephemeral stream, swale, gully,	Feature does not contribute flow to an (a)(1)-(a)(2) water, it is an artificial (manmade) feature constructed

<sup>1</sup> Map(s)/Figure(s) are attached to the AJD provided to the requestor.

<sup>2</sup> If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

<sup>3</sup> A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where independent upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD form.

<sup>4</sup> Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps Districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

<sup>5</sup> Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where independent upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD form.

<sup>4</sup> Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps Districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

<sup>5</sup> Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM)  
NAVIGABLE WATERS PROTECTION RULE

**Other data sources used to aid in this determination:**

Data Source (select)	Name and/or date and other relevant information
USGS Sources	N/A.
USDA Sources	N/A.
NOAA Sources	N/A.
USACE Sources	N/A.
State/Local/Tribal Sources	N/A.
Other Sources	Wetland Data Forms and ORAM Forms within referenced report.

- B. Typical year assessment(s):** A typical year occurs over a rolling thirty year period and includes the analysis of precipitation and other climatic variables to establish a normal period range (seasonally or annually) for a specific geographic region where the aquatic resource occurs. One (1) point-in-time data source, 9 September 2020, with a corresponding antecedent precipitation tool report, were included in the evaluation for the excluded features on-site. The antecedent precipitation tool was utilized to determine typical year for point-in-time data sources. Wetland adjacency was assessed on 9 September 2020. Based on the antecedent precipitation tool, 9 September 2020 is included during the WebWIMP dry season and has a Palmer Drought Severity Index of (2.54) moderate wetness. The 30-day rolling total for precipitation was within the 30-year normal range. Therefore, site conditions are within typical year conditions.
- C. Additional comments to support AJD:** The property is located outside of the FEMA 100 year floodplain.

<sup>1</sup> Map(s)/Figure(s) are attached to the AJD provided to the requestor.

<sup>2</sup> If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

<sup>3</sup> A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where independent upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD form.

<sup>4</sup> Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps Districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

<sup>5</sup> Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
