

DRAFT FINDING OF NO SIGNIFICANT IMPACT

Village of New Boston Phase 8B Combined Sewer Overflow Improvements Scioto County, Ohio

The U.S. Army Corps of Engineers, Huntington District (Corps) has conducted an environmental analysis in accordance with the National Environmental Policy Act of 1969, as amended. The Environmental Assessment (EA) dated **DATE**, for the Village of New Boston Phase 8B Combined Sewer Overflows Improvements Project addresses the existing collection system which has reached the end of its useful life and experiences overflow events in Scioto County, Ohio. The need for improvements to the wastewater collection system in the proposed area is to reduce combined sewer overflow discharges and continue the Village's effort to separate the combined sewer system.

The Final EA, incorporated herein by reference, evaluated the proposed action alternative that would provide residents with a reliable and safe wastewater collection system in the study area. Section 2.0 of the EA discusses all alternatives. The proposed action alternative includes:

- Extension of sanitary sewer along West Avenue approximately 730 linear feet (LF) to Grace Street where it will connect to the existing interceptor for the West Avenue Pump Station; replacement of the Webb Alley Pump Station's dry well located on Millbrook Avenue with a new submersible pump station that uses chopper pumps; installation of metering at the intersection of Rhodes Avenue and Lakeview Avenue; and if funding is available, installation of structural lining in several sanitary sewers and manholes. The sanitary sewer would connect to the West Avenue Pump Station proposed in Phase 9.

SUMMARY OF POTENTIAL EFFECTS:

For all alternatives, the potential effects were evaluated, as appropriate. The evaluation of effects was focused on key resources affected by the proposed alternatives. A summary assessment of the potential effects of the Proposed Action Alternative are listed in Table 1:

Table 1: Summary of Potential Effects of the Proposed Action

Resource	Insignificant effects	Insignificant effects as a result of mitigation*	Resource unaffected by action
Aesthetics	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Air quality	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Noise levels	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Socio-economics	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Environmental justice	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Aquatic resources/wetlands	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Invasive species	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Fish and wildlife habitat	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Threatened/Endangered species	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Historic properties	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Other cultural resources	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Floodplains	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Hazardous, toxic & radioactive waste	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Land use	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Climate	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Prime and Unique Farmland	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Wild and Scenic Rivers	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Water quality	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

All practicable and appropriate means to avoid or minimize adverse environmental effects were analyzed and incorporated into the proposed action alternative. Best management practices (BMPs) as detailed in the EA will be implemented, if appropriate, to minimize impacts. For additional details of the proposed action alternative, see Section 3.0 of the EA.

Pursuant to section 7 of the Endangered Species Act of 1973, as amended, the U.S. Army Corps of Engineers determined that the proposed action alternative will have no effect to the following federally listed species or their designated critical habitat: Indiana bat, Northern long-eared bat, Fanshell, Pink Mucket, Sheepnose mussel, Snuffbox mussel, Running buffalo clover, Small whorled pogonia, and Virginia spiraea. The U.S. Fish and Wildlife Service (FWS) concurred with the Corps' determination on 11 December 2020.

Pursuant to section 106 of the National Historic Preservation Act of 1966, as amended, the U.S. Army Corps of Engineers determined that historic properties would not be adversely affected by the recommended plan. The Ohio State Preservation Office (SHPO) concurred with the determination on 14 December 2020.

A 30-day public, state, and agency review of the Draft EA and FONSI was completed on **DATE**. All comments submitted during the public review period were responded to in the Final EA and FONSI.

Technical, environmental, economic, and cost effectiveness criteria used in the formulation of alternative plans were those specified in the Water Resources Council's 1983 Economic and Environmental Principles and Guidelines for Water and Related Land Resources Implementation Studies. All applicable laws, executive orders, regulations, and local government plans were considered in evaluation of alternatives. Based on this report, the reviews by other Federal, State and local agencies, Tribes, input of the public, and the review by my staff, it is my determination that the recommended plan would not cause significant adverse effects on the quality of the human environment; therefore, preparation of an Environmental Impact Statement is not required.
