**CHANNEL MAINTENANCE DREDGING TENTATIVE SCHEDULE**

**HUNTINGTON DISTRICT**

**OHIO RIVER**

Notice is given that on or about 24 August 2020, Amherst Madison, contractor for the US Army Corps of Engineers, will commence channel maintenance dredging on the Ohio River in the lower approach to Robert C. Byrd Locks and Dam, Ohio River, Mile 279.6. Approximately 100,000 cubic yards of material will be dredged at this location. The nearest known downstream municipal water intake is at Huntington, WV, Ohio River, Mile 306.9. Successive dredge sites, mile points, dates, quantities, and nearest downstream municipal intakes are listed below. Disposal operations will take place at the permitted sites for each location.

The contractor's floating plant consists of the M/V MILTON, the M/V ANDY MULLINS, one barge mounted crane, and two material barges. The M/V MILTON and the M/V ANDY MULLINS will be monitoring marine channel 13. Dredging will be performed from 6:00 AM through midnight, 7 days per week. A government dredge inspector will be in attendance at each site. Navigators are requested to be alert to the location of the dredge and its disposal operations. **It is essential that navigators await the passing signal from the dredge prior to proceeding with caution.** During non-working hours, all equipment will be moored outside the navigation channel, marked and lighted according to regulations.

<u>SITE</u>	<u>Approximate Commencement Date</u>	<u>Estimated Quantity (CY)</u>	<u>Nearest Downstream Municipal Intake</u>
