CHANNEL MAINTENANCE DREDGING

WILLOW ISLAND LOWER APPROACH

OHIO RIVER, MILE 161.7

Notice is given that on 24 May 2021, Amherst Madison Inc., contractor for the U.S. Army Corps of Engineers, Huntington District, will commence channel maintenance dredging in the lower approach channel at Willow Island Locks and Dam, Ohio River, mile 161.7.

The contractor's floating plant will consist of the M/V FLORENCE T, M/V BUS BROWN, two barge mounted cranes, and three material barges. The M/V FLORENCE T will be in the vicinity of the dredge site and should be contacted for passing arrangements on marine channel 13. The M/V BUS BROWN will be used to transport the material barges between the dredge site and disposal area and will be monitoring marine channel 13. Dredging will be performed between the hours of 6:00 a.m. and midnight and is anticipated to be complete on or about 28 May 2021. The dredged material will be placed in-water, upstream of the dam.

The contractor's floating plant will be moored at the worksite during non-working hours and will be lighted according to regulations.

Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made.
