CHANNEL MAINTENANCE DREDGING TENTATIVE SCHEDULE

HUNTINGTON DISTRICT

OHIO RIVER

Ohio River channel maintenance dredging in the Huntington District for the 2015 season will be performed by contract with Luhr Brothers, Inc., Columbia, Illinois. On or about 12 September 2015, the cutterhead suction dredge BILL HOLMAN will commence dredging in the lower approach of Captain Anthony Meldahl Locks, Ohio River, mile 436.1. Approximately 25,000 cubic yards of material will be dredged at this location. The nearest known downstream municipal water intake is at Cincinnati, OH, Ohio River, Mile 462.9. Successive dredge sites, quantity, mile points and nearest downstream municipal intakes are listed on the next page.

Dredging will be performed 24 hours a day, 7 days per week. The dredge BILL HOLMAN will monitor marine channel 13. A government dredge inspector will be in attendance at each site on arrival of the contractor’s crew and equipment.

Navigators are requested to be alert to the location of the dredge and its floating discharge pipeline. The dredge and attendant plant will be marked and lighted according to regulations. It is essential that navigators await the passing signal from the dredge prior to proceeding with caution.
