CHANNEL MAINTENANCE DREDGING

ROBERT C. BYRD LOWER APPROACH

OHIO RIVER, MILE 279.6

Notice is given that on or about 31 May 2016, Amherst Madison, contractor for the U.S. Army Corps of Engineers, will begin maintenance dredging operations in the lower approach of Robert C. Byrd Locks and Dam, Ohio River, mile 279.6.

The contractor's floating plant will consist of the M/V MILTON, two barge mounted cranes, and four material barges. The M/V MILTON will be in the vicinity of the dredge site and should be contacted for passing arrangements on marine channel 13. Dredging will be performed from 6:00 AM through midnight, 7 days per week, and the anticipated completion will be on or about 7 June 2016. A government dredge inspector will be in attendance at each site, full time. Disposal operations will take place at the permitted site located at the project.

Navigators are requested to be alert to the location of the dredge and its disposal operations. It is essential that navigators await the passing signal from the dredge prior to proceeding with caution. During non-working hours, all equipment will be moored outside the navigation channel, marked and lighted according to regulations.
